

NEW ORLEANS CLEAN ENERGY COLLECTIVE

Clean Energy Awareness through Art

Xavier University of Louisiana, Office of Sustainability
 Alliance for Affordable Energy
 Hammond-Northshore Jack and Jill

KEY GOAL:

To utilize art to prepare underserved communities, K-12 students and HBCU students with tools to decrease their carbon footprint while learning about clean energy activists and resources, clean energy types, and the importance of clean energy adoption

By introducing concepts of clean energy to youth, we seek to not only increase their knowledge of, engagement in and adoption of the benefits of clean energy but also possibly prevent the worst impacts of global warming securing our and their future.

JUSTICE40 POLICY PRIORITY FOCUS:

3. Increase parity in clean energy technology access and adoption in disadvantaged communities

8. Increase energy democracy (stakeholder engagement to facilitate decision-making) in disadvantaged communities

6. Increase clean energy jobs, job pipelines, and job training for individuals from disadvantaged communities
