

INNOVATIVE GREEN FARMING SOLUTIONS

- The Savam Team is a multi-stakeholder project management partnership that addresses environmental and energy issues through innovative solutions. The Savam team comprises individuals from all walks of life, from Haiti, Central, North, and South America, with different educational, faith, and economic backgrounds.
- Our philosophy introduces a new level of consciousness and accountability through application and education that engages everyone to participate and collaborate in restoring the planet. Our simple initiatives involve creativity and improving existing ideas, support and inspiration to less-developed communities, and scaling those small areas for resiliency.
