

Skip Technology: Advancing Rural Communities

- Skip Technology a leader Long Duration Energy Storage (LDES).
- LDES is crucial for micro grid reliability, resilience and to enable it to utilize renewable energy as a principle source of power generation.
- Skip Technology will be able to partner with rural communities and provide this LDES, that will revolutionize rural micro grids.
- This storage, combined with renewable energy sources will enable rural communities to have micro grids at the most cost effective rates
