

# GREEN ACRES REVOLUTION: RURAL FINANCING

Our model prioritizes sustainable development practices that are environmentally friendly and energy-efficient. The model incorporates green building practices and renewable energy sources because as property managers, we aren't incentivized to maximize profits and in return can reinvest into energy efficient solutions for each property.

The model enables community engagement and involvement in the planning and development process for single family homes. This engages local financing stakeholders incentivized in the reinvestment and development of local real estate.
