

NORTHERN NEW MEXICO COMMUNITY RESILIENCE CENTERS

Plan

All steps needed to enact the Village of Chama's vision for the center including construction of a microgrid (solar panels and battery storage)

Create

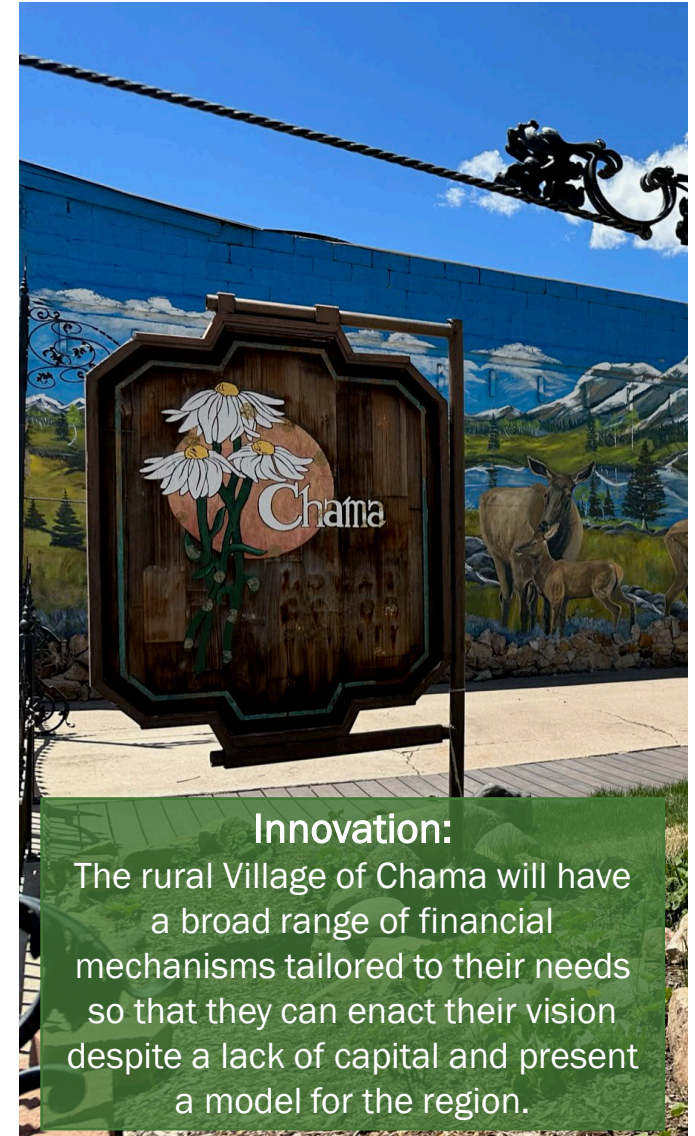

Financial model to transform old Chama Community Center into place for resilience against extreme events and frequent blackouts

Provide

Renewable energy and project management experts, leveraging grant funding and tax incentives, private and community investment options

Empower

A Learning Cohort of regional rural communities as observers

Innovation:

The rural Village of Chama will have a broad range of financial mechanisms tailored to their needs so that they can enact their vision despite a lack of capital and present a model for the region.
