

**We will partner with rural towns in Southwest New Hampshire to build solar farms and energy storage and pursue a Justice40 priority of lowering energy costs for low-to-moderate income (LMI) communities.**

By the end of Phase Two (July 2024) we will have:

- Solar site(s) selected
- Site control
- Final designs completed and bids secured
- Energy offtakers identified
- Construction permit package approved
- Utility interconnection costed and approved
- Financial plan finalized
- Initial investors and lenders identified
- Grant & tax credit applications submitted

Team highlights:

- Long term connections to Harrisville and Dublin NH (project sites), and experience in public-private projects in rural Southwest NH
- 40+ years combined experience in business, entrepreneurship and solar, and work with rural and disadvantaged communities
- 7MW LMI solar launched across 40 projects
