More Accessible, Affordable Heat Pumps

Helping families in the rural Northeast:

- Save on heating and cooling bills
- Reduce carbon emissions
- Increase comfort and air quality

We are bringing electrification to the average American home, starting with heat pumps. We believe in simplifying and adding trust to the process, helping homeowners find installers, secure incentives, and optimize financing via heating-specific loan programs. Our analytics identify homeowners that will save significantly with a heat pump and minimize upfront cost.

Location of Primary Benefits

Harwinton, CT
