Alabama Black Belt Energy Connection

When the time is right, then the connection is right. Alabama has been a car manufacturing state since 1993, leading the way in advanced car manufacturing. The time has come for Alabama to lead in EV car manufacturing, and what better way to do this than to use the soils of Alabama to grow the biomass to build the batteries for these new vehicles. We have the expertise in growing and manufacturing like no other. What a connection! What an exciting time to be an Alabamian and what an exciting time for our Country.

Principle information:

City of Principles Prichard, Al Mobile County

Project region the Black Belt for the State of Alabama
