

SOLARSHARE
WISCONSIN CO-OP

**TOGETHER WE'RE BUILDING A
BRIGHTER FUTURE FOR ALL IN WI**

SolarShare WI Cooperative democratizes clean energy investment, connecting rural and urban people together to fund and develop 1-5 MW solar farms within rural areas across Wisconsin. By expanding the pool of investors, SolarShare increases the total investment in rural community-scale solar farms, creating economies of scale that can lower energy burdens for rural areas. Drawing on the cooperative ethic of rural Wisconsin, SolarShare unites people across the state to create a clean energy future that benefits ALL in Wisconsin.
