

# Remote Energy Solutions Partnership Plan

## Company Mission

- Kick start the adoption of renewable energy systems in rural Alaskan villages
- Reduce dependence on fossil fuels
- Mitigate the negative impacts of climate change

## Outcomes and Impact

- Determine what renewables will work for small remote Villages in Alaska
- Find partners to help design a renewable energy system that WORKS in rural Alaska

The resulting partnerships and planning will lead to a renewable energy demonstration project in Rampart, AK that can be easily transferable and replicable in other villages within interior Alaska.

## Project Location: Rampart, AK
