

SUSTAINING PRODUCTIVE UTILIZATION of RESOURCES

SMALL, RURAL SOUTHWESTERN WYOMING TOWN WANTS...

...to serve as a model of how to team together to spur the development of clean energy. Phase 1 will overcome problems posed by aging infrastructure and Phase 2 will address how to recycle and re-use water to enable industry to grow while preserving limited water resources.

TerraPower's nuclear, utility scale Kemmerer Power Station Unit 1 Demonstration project near the towns of Kemmerer and Diamondville Wyoming can serve as a model for the five planned plants in the region.
