

## Port Isabel Energy Efficiency Initiative

Partnership between The First United Methodist Church at Port Isabel, White Lumber & Supply, JEA Construction, and SonMa Solutions

Increase energy efficiency in low-income households through air sealing, caulking, and weatherstripping

Reduce energy expenditure and lower the community's carbon footprint while supporting local businesses

Efforts will be quantified by tracking changes in home energy expenditures

Partnerships will help prepare the community for future clean energy projects and provide a model for other rural communities
