Warm Springs Consulting is proud to introduce Clean Energy Bounty (CEB), made possible with the support of the Energizing Rural Communities Prize. As a B Corporation one of our missions is to empower rural, disadvantaged, and energy-overburdened communities to embrace renewable energy and energy savings projects.

CEB kicks off with a focus on facilitating four Energy Treasure Hunts within rural or remote communities hosting industrial, government, educational, and healthcare facilities with annual energy costs exceeding \$100k. CEB extends beyond Energy Treasure Hunts by creating regional outreach, engagement and excitement through an application and submission process; offering facilitated hunts, including expert validation of hunt findings; as well as research, education and guidance regarding project implementation and funding sources. The Duck Valley Indian Reservation will host the initial Treasure Hunt.

Following Phase II, WSC will actively seek a Prize award to expand CEB and offer post-hunt technical support, including awarding prize money for two capital-intensive clean energy projects, guidance on securing financial resources, and implementation support for up to a year. The project will culminate in an open-source playbook, enabling other communities across the U.S. to replicate CEB's success.

Clean Energy Bounty Seeker Team Member Information:

Team Lead: [Deborah LaSalle, J.D.](#), Sustainability Consultant, Public Engagement Specialist, Energy Analyst, Warm Springs Consulting

Outreach Partners:

- [Laurie Zuckerman](#), Director, Chair of Communications, Marketing & Education, Rotary District 5400, Environmental Sustainability Rotary Action Group
