THE PLAN:

The goal of our activity with Chiricahua Community Health Center will be to establish a new clean energy loan fund with a CDFI partner to effectively deploy low cost and reliable capital to fund clean energy projects in rural communities. We hope that this new platform will provide a roadmap for how to attract additional funding for these types of projects across the country. In partnership with Chiricahua Community Health Center and alongside the DOE, we are excited to bring these essential support systems to the rural communities that historically have been left behind.
