

Energizing Rural Tribal Communities

Innovative, Native-led renewable energy projects in some of the most rural, remote and underserved communities in the US, including what will be the first Tribally owned Virtual Power Plant (VPP) Power Purchase Agreement (PPA) in the country, a demonstration of Tribal, State and Federal Government collaboration.

Mission: To support Tribes' self-determined efforts to diminish poverty, mitigate climate change, and achieve true energy sovereignty through renewables.

Strong Partnerships, Track Record & Team

- Lived experience in communities.
- Stakeholder engagement for long-term successful projects.
- Solar and energy storage project implementation.
- Solar finance innovation in some of the most remote, low-income parts of the world.
- Workforce development with gender equity lens.

Just Transition
