Team Member 4: *Ernest Calderon* - *Marketing Coordinator*

Partner: *Solstice Power Technologies LLC*

Project Location:

Town of South Hill, VA, 23970-2806

Short Description:

ESA is a solar development and engineering company with a strong reputation for excellence in the solar industry. Our experienced team of professionals include engineers, project managers, and developers, working together to ensure the highest quality of service and attention to detail. Our mission is to provide pathways to clean energy by enlisting low-to-moderate income community members to receive benefits from solar farms in their community. The primary goal of our proposed partnership activity is to increase the participation from low-income households in the town of South Hill to Marrow Street Solar Farm Project by strengthening ESA's relationship with the town through local investment and public outreach.
