

Generation Flex: Light without compromise

Luminaire Description	Signify's best-in-class, modular Generation Flex luminaire offers a high level of flexibility to optimize towards efficiency, quality of light and sustainability. Next to its outstanding performance, this innovation supports a range of designs and applications to cover a wide range of market requests, delivers an equitable experience for both the building owner and the building occupant, and makes a leap forward in sustainability by taking circular design principles into account throughout the whole value chain. Hence, it truly is light without compromise.
Intended Application	The Generation Flex luminaire was designed to optimize efficiency, quality of light and visual comfort in office environments, and sustainability.
