

Carbontech Development Initiative (CDI) is a first-of-its-kind, large-scale carbontech market transformation and grant-seeding commercialization hub. CDI invests non-dilutive capital in research and development teams and startups to fill critical gaps in carbontech technology innovation, human capital, and market development

Accelerate DAC (aDAC) MVP

Expected Outcomes

<p>Better product market fit understanding - Increased chances of success for DAC start-ups</p>	<p>Cross-sector coordination on policy, DEIA, workforce development</p>	<p>Market development for DAC as a sector</p>	<p>Success model for other DAC and hard-tech accelerators</p>
---	---	---	---

CDI has assembled a highly experienced and expert team to develop and deliver the aDAC MVP. The CDI aDAC team brings:

- Deep expertise in carbontech and direct air capture
- Extensive experience with accelerator program development
- Strong ecosystem partnerships and extensive network
- Broad access to resources and a proven track record of success
