

Empowering Neighbors on Upgrading Grove Hall (ENOUGH)

The Project Team will develop four innovations for improving the quality of life and reducing energy burdens for Grove Hall and communities like it:

1. Develop **technical solution packages** conveying clear processes for decarbonizing homes and small businesses
2. Compile integrated financing and **funding packages** that outline affordable pathways for decarbonization
3. Identify pathways to provide **resident opportunities** for training and employment in the clean energy transition
4. Create a **Community Navigator** position to connect residents with resources

Project Team

Greater Grove Hall Main Streets: Community-based organization and team lead. Will hire FTE to build capacity and serve as Community Navigator.

Slipstream: Mission-driven nonprofit serving as technical lead. Will co-lead project design and manage subcontracts.

Action for Boston Community Development: Nonprofit project partner that serves as the statewide implementation partner for the MA Weatherization Assistance Program. Will co-lead outreach and community engagement.

TSK Energy Solutions, LLC: Black-owned energy consultancy that is a local leader in environmental justice and workforce development. Currently leading the Green Zone feasibility study, landscape analysis and air quality monitoring in Grove Hall.

A Future Community Advisory Board

Community members, homeowners, renters, landlords, local leaders, businesses and regional technical experts.
