Quincy
...in the heart of Florida's Future

Energizing Quincy, Florida's Historic Mainstreet

We will develop the Mixed Use Urban Community Microgrid (MUUCD) to provide the benefits of renewable microgrids to Quincy, Florida's historic downtown. Our work will begin with the historic building housing the future Florida Museum of African American History and several residential apartments. Afterward, we will repeat the MUUCD concept in other commercial and residential buildings as we revitalize historic Quincy, Florida.
