

# Sabathani Community Energy Project

Goal: Create a Community Resilience Hub to serve the 87% BIPOC community of South Minneapolis.

Renovate Sabathani building for energy-efficiency and upgrade HVAC with an expandable renewable energy geothermal system.

Install solar microgrid technology and battery back to remain operational during power outages.

Provide a living laboratory and training center for geothermal and solar workforce training and job placement.

Expand to multi-family housing and neighboring community with future phases.
