

SLO Green and Healthy Homes: Equity Focused Retrofits

WE PROPOSE TO

Convene a community-led process to design a “concierge” service that supports mobile home electrification retrofits and raises the capacity of low-income residents to directly benefit from multiple funding sources.

OUR INNOVATIONS

1. Identify how mobile home electrification can be cost-effective.
2. Facilitate a process to co-create a concierge service grounded in community need.
3. Use the concierge service to hide complexity from the user and maximize benefit.
4. Apply regional electrification programs to the mobile home building stock.
5. Increase awareness of climate solutions in low-income households using tested messaging.
