

RESTORE, REPAIR & RESILIENCE HOME IMPROVEMENT PROGRAM

Made possible by:

United Way
of Northeast Florida

The **Restore, Repair, and Resilience Program** assists residents in making improvements to their homes, ensuring they can remain in safe, stable housing now and into the future. These families have experienced hardships that have hindered their ability to maintain homes that have fallen into disrepair, suffered storm damage, or experienced typical issues common to older dwellings.

The **Restore, Repair, and Resilience Program** provides valuable services offering energy efficiency solutions, weatherization upgrades, consumption analytics, quality-of-life improvements, and utility ways-to-save education.

CURRENT PILOT

Impact Goal:
Weatherize and Repair
15 PILOT homes

SCALING UP

Impact Goal:
Weatherize and Repair
at least 200 homes
