

Just Energy Initiative

ENRg UP, PEOPLE UP, BUILDINGS UP

The Hijra House **Just Energy Initiative (JEI)** engages underserved areas across nine Southern Mississippi counties; educates, incubates, and incorporates diverse, minority workers and energy efficiency businesses/entrepreneurs; and reduces greenhouse gas emissions from South Mississippi's existing building stock.

Further, JEI aims to offer an innovative model for both accelerating building upgrades and achieving economic development and health goals locally and throughout the Southeast region of the United States.
