

July 2023
Freeport, Maine

The concept

Through 2028, retrofitMAINE will identify innovative, cross-agency funding bundles and establish local training centers to facilitate 100 high-performance residential retrofits in Freeport and Lewiston, Maine.

Naomi Beal
passivhausMAINE
executive director

Randy Rand
retrofitMAINE
training director

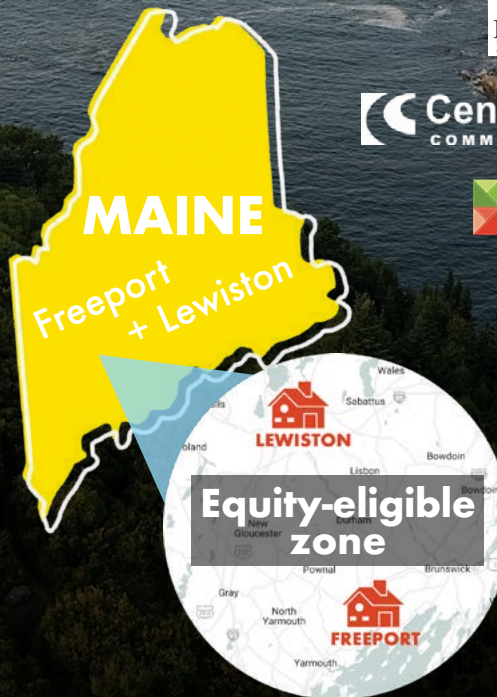

George Cox
retrofitMAINE
committee chair

The why

Climate change, high energy costs and emissions are eroding the standard of living in Maine—especially for low-income families. Too many Maine homes fall into the rural energy efficiency gap. retrofitMAINE’s comprehensive, and action-oriented approach will find and aggregate existing sources of funding, expand local retrofit trainings, and connect partner organizations with homeowners.

The partners

2025-2026: 10 passive home pilot retrofits. Train 250 professionals and homeowners

2026-2028: Scaling up to 90 further retrofits. Engage 20 core construction pros per 10,000 residents.
