

Raymond-Moving-Forward Summary Slide

While preparing for submitting our application prior to the 7/18/23 deadline, we also found the time to prepare displays for our town fair, recently held July 7-9 in Raymond, NH. We signed up 12-15 new interested community members desiring more information on our projects. We met with many of the residents during the fair, explaining the energy-efficiency improvement for these 75 mobile homes, all of which are sited on their own lots. We held an event for these 75 households on 7/12/23 at our high school cafeteria to further explain the project to them. Our project has far exceeded the rules expectations for Phase I (forming an organization and staffing up). We have taken up the challenge to accelerate all of the minimum technologies to develop an advanced insulation technology during Phase I. We have 6 additional mobile home parks in Raymond which will be considered for action in future Phases of Buildings Up!
