

WYOMING ENERGY CO-OP

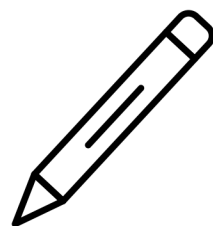

We are a group of outdoor enthusiasts with a passion for bringing energy efficiency and electrification to the wild and beautiful state of Wyoming.

Our mission is to preserve and improve the environmental quality and longevity of Wyoming by providing energy efficiency and electrification resources and opportunities.

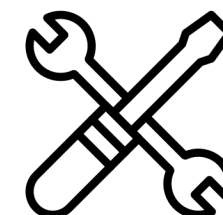

Innovation and Research

It's vital that encouragement and support never been in short supply for innovators. We will connect these individuals with funding and organizations capable of helping them realize their goals. Energy storage/transmission, home/business energy efficiency, and general electrification are examples of areas we want to engage interested individuals/groups.

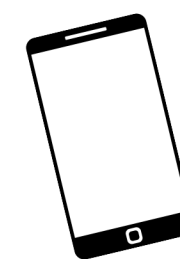

Education

We give presentations in person or electronically geared towards any audience. Examples of potential interested parties: Schools, higher education, businesses, fraternal organizations, manufacturers, utility companies, elected officials, and anyone/everyone else who might be interested.

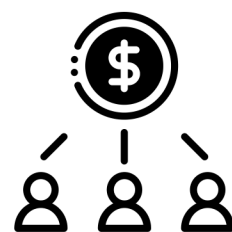

Contracting

Partnering with local businesses in a variety of ways. While offering training and certification opportunities, we intend to facilitate employment and projects including rooftop solar, heat-pump installation, electric water heaters and much more

Outreach

We attend and host events around the state for in-person connections while also engaging groups and individuals on social media

Fundraising

Charitable donations enable us to serve every interested party in Wyoming. Our treasured donors share our passion and vision for a cleaner, sustainable energy future benefiting everyone while conserving our natural beauty and resources.
