

Home Upgrades for Gaining Efficiency (HUGE)

The Challenge

Teams propose a new initiative or innovation to an existing initiative for delivering scalable and replicable building upgrades to buildings in disadvantaged communities, low-and moderate-income (LMI) households, and underserved commercial, nonprofit, and public buildings, collectively referred to as “equityeligible” buildings.

Our Solution

We are a sustainability non-profit with a focus on living, working, and building. For 15+ years we have worked to make equitable positive change in Hamilton County, TN and surrounding counties. Our solution to the issue is to make long-term changes in housing stock, government policies, provide pathways out of poverty, thus making communities more resilient and sustainable.
