

Ecolibrium3's CBO mission is to lead and inspire change towards an equitable and sustainable future. With 15 years of experience in the home energy industry, we are ready to lead our J40 community and region through an equitable energy transition.

Our Innovation Zone:

- Eco3's pilot zone is our Justice40 neighborhood of Lincoln Park, Duluth, MN.
- Our full-scale implementation includes 1-4 unit low-income homes in rural northern MN and WI.

Our Challenges:

- Audit and scope of work development
- Timely and consistent navigation to resources
- Workforce availability
- Anti-displacement approaches

Our Innovations:

- Comprehensive efficiency and electrification audit with healthy housing, rain-readiness, and aging-in-place measures
- Scalable data management tool that provides community energy navigators what they need to support access to IRA and other resources
- Energy Training Corps to fill in critical gaps in workforce in EJ and rural areas
- Housing equity menu for rental properties, to reduce potential green gentrification

Lincoln Park by the numbers:
