

Our Rural County

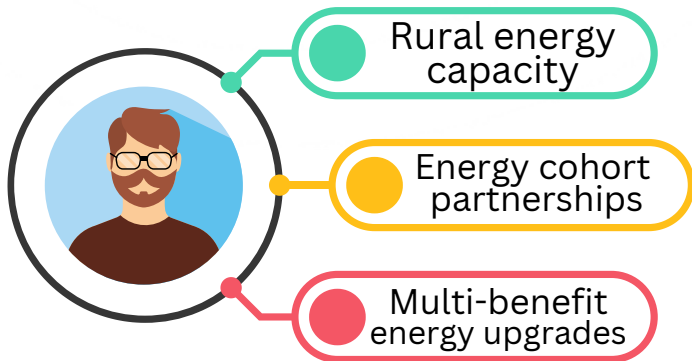

The SEDC Energy Team

Kory Hayden, Jen Thackeray, Alia-Roca Lezra, Jason Young

The Siskiyou EDC team has been serving Siskiyou communities for nearly 40 years. The SEDC works with jurisdictions and businesses to create a prosperous rural economy. Several program managers are dedicated to building capacity for clean energy in Yreka's economy.

Our Project

Our MOU Partnership unites our organization with the county's nine jurisdictions, to prioritize clean energy projects, together.

W. Miner Energy Cohort

This phased project will locate clean energy upgrades within ten key locations in the West Miner Historic District, to stabilize the city's most historic economic assets

Our mission is to **empower** business growth, **build** success, and **connect** our communities with vital resources to create a prosperous Siskiyou. This prize will help us overcome barriers (distance, climate, and poverty) and advance clean energy projects in rural CA.
