

Community Energy Concierge for Equity-Eligible Businesses

✓ Comprehensive Retrofits and Electrification

The *Energy Concierge Team* performs energy assessments and scans for a cohort of regional and vertical customer sites to develop a comprehensive list of prioritized energy efficiency, conservation and demand response actions that will form the basis of that customer's Energy Journey. The Program offers a comprehensive array of energy efficiency measure options and data connection/analytics platform to enable demand response and an array of ongoing virtual and in-person Strategic Energy Management (SEM) services via the *Energy Concierge Team*.

✓ “Equity-eligible” Focus

The Program will focus at least 90% of its projects on Equity-Eligible businesses which include businesses in Justice 40 census tracts, a host of individual underserved commercial businesses, as well as any locally defined equity-eligible buildings (See [Section 3.5 of the Buildings Up Prize rules](#)).

✓ Workforce Development and Community Outreach

Our Team recruits and facilitates training for diverse staff in Energy Engineering, Energy Coach, and CBO Outreach roles, that collectively make up the *Energy Concierge Team*. They also work with customer, contractor and supply chain participants to ensure businesses have the skilled labor, bandwidth and supplies needed to successfully support this work in their communities.

CLEARResult
