

# RURAL ENERGY PARTNERS

## ANCHOR PROJECTS

- Financing already secured for several locations
- Create local demand for workers and training
- Have a stand-alone impact on local communities

## ECONOMIES OF SCALE

- Anchor projects establish training, financing, and partnerships in rural communities
- Clusters of local equity-eligible projects can reduce costs through economies of scale by coordinating with anchor projects

## REPLICABLE

- 500+ barns in Midwest with nearly identical design can serve as anchor projects for many communities
- Rural equity-eligible projects face similar challenges to one another
- Financial solutions can be applied across different communities with little variance
