

The diesel generators currently used for disaster relief contribute to the pollution of our atmosphere, the degradation of our health and rely on a volatile commodity that is often unavailable in a disaster zone.

The OG914 Industrial Solar Generator aims to make them obsolete. Features include:

- **Full set up and break down within 5 minutes**
- **3.5KW Solar array with 14kWh LFP battery and 6500W inverter**
- **Capable of Producing 20KW per day**
- **Emission and noise free**
- **Small footprint allows up to five units on 20ft utility trailer, 10 units in 40ft shipping container.**
