

SIMPLISOLAR SOLAR ENERGY SYSTEM

The **SimpliSolar System** is a user-friendly and adaptable solar energy generation system that offers “plug and play” integration of solar components. The device and components offer a clean and simple interface so that anyone can create a custom and adaptable energy generation system for off-grid purposes. The system will offer “smart/AI” technology within its integrated circuit to assist the user with assembly. The system products will be available off the shelf at “big box” stores and online.
