

Doug Thorpe

Thee Solar Company, LLC

Mt Sterling, Kentucky

SOLUTION: Thee Solar Roofing **It is the Roof!**

We will produce a solar panel that is quick & obvious to install (plus, it can be the roof for over 100 years!).

Extra tall aluminum frame is fastened directly to old roof

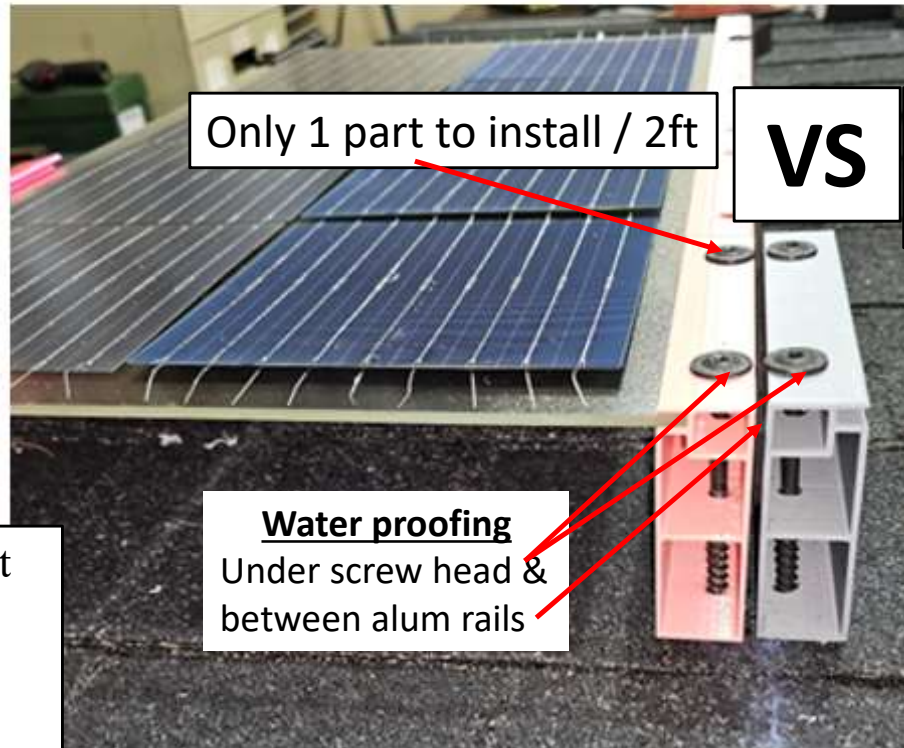

PROBLEM: Solar Energy has high costs B/C many parts to install. At \$2.55/watt, each 6"x6" cell costs \$13.26 to install, but only generates \$0.766/year of electricity = 17.3 year

1st Generation

Some roofers still prefer 1st Gen b/c it is standing seam metal roof

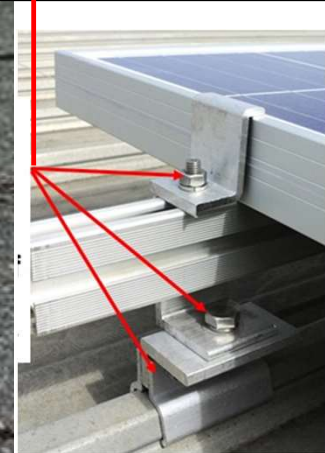

2nd Generation

Competition

VS

17 parts (9 unique)
1 man-hour/panel to install

We expect to sell \$83M by 2028 with 49% profit margin out of \$264B market.
Our customers are DIY and roofers who want to install solar & make more profit per customer
