

**Problem:**  
Inefficient, highly  
polluting,  
temporary  
construction site  
offices

## Solution: A solar-powered, self sustaining microgrid

- Geographically remote, temporary construction offices
  - Key Targets
    - Companies building large renewables projects
      - Especially those who have pledged carbon reduction goals
    - Homelessness crisis in both cities and in rural areas
    - Natural disaster relief

# Modular Microgrids

Solution: Create an energy efficient construction office microgrid powered by solar
