

Automated Net Meter Interconnection

Real-world Frustrations with Net Meter Interconnections

- Residential and small commercial customers wait months to use their solar panels
- Utilities struggle with complex, expensive, and ineffective processes
- Current processes and systems are a barrier to widespread use of solar energy
- No solution for future technology

The NetMeterGO.com Solution

- One-click reporting
- Streamlined, efficient PTO process
- Intuitive, personalized journey for end-customer
- Instant identification of issues

- **Future Flexibility**

Technology

- Available in the cloud or on-premise
- Flexible, secure data transfer to support process
- LAMP Stack
- Scalable for any size utility

Status

- Version 1 complete, medium to high market readiness (CARAT)
- Seeking pilots with utilities
- A “bootstrapped” idea with no debt

Next Steps

- Establishing additional use cases for code/data
- Market research on next-version functionality
- Test and roll out product enhancements
