

There Are No Affordable Residential Storage Solutions

80% of the US needs heating

Heating accounts for more than 42% of consumer's utility costs

Battery storage is too expensive and energy costs continue to rise

Soltheos

Bringing clean, affordable battery storage to the residential market

Soltheos Residential Thermal Battery

Our batteries can store excess solar energy or optimize electric rate variations and deliver heat when solar power is unavailable or electric prices are high. This is done automatically by the algorithm in our battery, reducing utility costs.

- 10x Cheaper
- Storage for Excess Solar Energy
- Optimizes Time of Use Electric Price Variations
- Expandable to Add Storage Capacity
- Configurable and Fully Automated
- Plug and Play, No Installation Cost
- Emission Free, Non-Toxic
- Promotes Energy Equality
