

TG Recycling is dedicated to solar panel recycling

- We can recover 90% of materials for reuse
 - Not landfilled or downcycled
 - Current technologies can recover only 10–15% of the materials
- Proprietary technologies to triple recycling revenue
 - By recovering high-value & low-content materials
 - Increment of revenue from \$4/panel to \$12/panel
- Innovative business model to minimize recycling cost
- Removal of toxic lead from recycling sludge
