

Technical Assistance Request

Sien has two lines of business: community solar development and customer experience management for service subscribers. Sien's request for technical assistance is in support of both these areas.

Areas of interest are as follows:

1. Independent review of plant design and validation of component and system performance
2. In-depth analysis of community benefits to include potential health impacts
3. Development of a clean energy vision for disadvantaged and energy cities & communities
4. Development of an integrated community emergency and resiliency plan
5. Cyber security risk assessments and system review
6. Techno-economic assessment
7. Environmental and energy justice impact assessment support
8. Justice40 Implementation strategy
9. Community Engagement Support
