

Permitting. Incentives. Tax Credits.

1Climate's AI enabled platform covers all your clean energy regulatory needs.

Regulatory challenges have put \$100+ billion of investment and 100+ GW of clean energy projects at risk.

1Climate's end-to-end platform leverages AI to streamline solar project development.

How 1Climate's Platform works:

- 1 Project Origination:** AI-powered regulatory project feasibility assessments
- 2 Project Management:** AI-powered project development plans and software integrations
- 3 Project Automation:** Permitting, interconnection, incentive filing automation
