Technical Assistance Request

Technical assistance required for Community Solar Services varies greatly but below is a rough list of areas that we believe that can always have consistent improvements.

Studies –

- Assistance studies:
 - Grounding Study
 - Ampacity
 - Voltage Drop
 - Arc Flash
 - Hydrology and Soil

Analysis –

- Generating reports:
 - Production consistency
 - Degradation of microinverters
 - Monetization schedule – YoY and MoM outlook

Contacts –

- Opportunities to Connect
 - Building Connections with investors/interested partners
 - Contacts with innovative ideas to support CSS's goal (Energy Storage, Modules, trackers, etc.)
 - Our Goal “Providing affordable renewable energy to low income/economically distressed communities”
 - Connecting with local, state, and national regulators

First Potential Site: (back up sites have been identified)

- ~100 Acres
- No south facing Obstacles
- Close to several Low Income/Economically Distressed Communities
- Any Excess energy can be sold to Surrounding cities/Utilities
