

## 2 Axis Solar Tracking System For Vehicles and Mobile Applications

Power

# 415W

Premium Maxeon SunPower Solar Cells

Daily Energy

# 4 kWh

More energy per square meter than any other mobile solar system.  
Daily output depends on location, time of year, and weather.

Winter Energy Increase

# 2.5X

Get the largest benefit when solar power is at a premium in the winter and the sun is lower in the sky

Summer Energy Increase

# 1.3X

Start making peak power early in the morning, all the way to sunset

Features:

- Fully automatic sun tracking
- Stows flat with a height of < 6"
- Dramatically increases daily solar energy

Potential Applications

- RV and Campervans
- Transportation Refrigeration Units (TRUs)
- Electrified Trailers and Delivery Vehicles

Making solar power a viable energy source for mobile and space limited applications!
