

Technical Assistance Request

We would greatly benefit from consulting and advice in the following areas:

- 1. Ballasted solar structural and load calculations.**
- 2. Civil engineering assistance to create a solar structure that can withstand soil conditions across the United States.**
- 3. Equipment quality testing services: helping us test the quality of our server rack batteries**
- 4. Statistical analysis of best locations across the United States to locate our new installation hubs**
- 5. Structural and wind tunnel analysis on a mobile carrier trailer**
- 6. Heat flow simulation and consulting design on our electronic cabinets: how do we properly regulate heat generation and heat shed to maintain stable operating temperatures in varying climates across the USA**
