

FARMING SOIL & SUN

- 1 We enable dual land use: **agriculture and solar energy**
- 2 We use an innovative **vertical solar** panel configuration
- 3 Our maximum production is in the **morning and evening** – prime times in the energy markets!
- 4 We partner and share our revenue with **farmers**
- 5 We were born between **Harvard and MIT** and we are a team of six people who truly believe in agrivoltaics

Let's unlock thousands of acres for clean energy, preserve agricultural lands, and help rural communities
