

## RAMP Solar

A Community On-Ramp To Renewable Power

**RAMP Solar is all about synergy.**

**Our solar will be the springboard for high-paying jobs and affordable employee-housing in Los Angeles' Antelope Valley.**

**By combining solar pv with agriculture (agrivoltaics), vacant land in this desert area will be transformed along with the lives of the people who will live and work there.**

**At the same time, the electricity generated will be used primarily for community solar aimed at LMI-household subscribers within the Antelope Valley.**
