

Tribuquent Corporation, a pending 501c3 non-profit, is dedicated to forging a sustainable future by connecting communities. Our flagship initiative, Feather Light Energy, seeks to revolutionize clean energy and empower Tribal Nations. Our mission is to provide funding and resources for community solar projects, aiming to create a robust project pipeline for Tribal Nations

The following activities align with the five meaningful benefits and will be developed with Tribal Nations through the support of the Community Power Accelerator:

1. Community Needs (Understanding Needs and Options)
2. Vision Planning (Goals & Objectives)
3. Environmental Assessment (Site Selection/Env. Considerations)
4. Solution Design (Infrastructure/Process & Contracts)
5. Cultural Sensitivity Preservation (Indigenous Knowledge & Tribal Colleges)
6. Equity Assessment (Workforce and Education Opportunities)
7. Financial Sustainability (Revenue Models, Agreements/ Strategies)
8. Ownership & Governance (Structures/Partnerships/Networks)

The “Tribuquent Team” is comprised of knowledgeable and skilled people within the areas of leadership, project management, engineering, planning, and seasoned solar development and installation. We represent a strong development team with vast and ample experience in the development and execution of community-based infrastructure projects that include solar energy. Members are:

- Lyle Macvey: Executive Director Tribuquent
- Alexander Hessinger: Head of Sustainability & Economic Research Tribuquent
- Elliot Christensen: Director of Planning Department Lower Sioux Indian Community
- Jordan Kanuho: Vice President Pawnee Nation of Oklahoma
- Graham Christensen: Executive Director GC ReVOLT LLC

Our planned portfolio has two initial solar gardens with up to 5MW within the Tribal Communities of Lower Sioux Indian Community of Minnesota and the Pawnee Nation of Oklahoma, with additional interest from other Tribal Nations to develop their own community solar projects.
