U.S. DEPARTMENT OF ENERGY

U.S. DEPARTMENT OF ENERGY

Organization Overview

- Our mission is to provide superior solar solutions to our LMI customers and disadvantaged communities through Collaboration, Execution, Planning & Flexibility.
- With over 75 years of collective solar project development experience, we are committed to bringing our expertise to communities like those from which we came.
- Riean has over 11 years of experience developing community solar projects that are 5 MW and smaller.

Project Overview

PROJECT 1: Boydton, VA (0.75 MWdc)

PROJECT 2: South Hill, VA (1 MWdc)

PROJECT 3: Skippers, VA (1 MWdc)

- Current stage of development: Scoping / Pre-financing
- Number of planned offtakers/subscribers: +500
- Current status of site control: In negotiations

Meaningful Benefits

- Equitable Siting: Our projects are developed on minority owned land.
- Workforce Development: We offer workforce development programing in conjunction with our projects.
- Community Ownership: We offer community ownership options which give community members access to the cashflows of our projects
- LMI Household Access & Savings: Our projects also provide lower cost electricity and provide access to significant household savings for LMI subscribers.
