

Missoula, MT's Clean Energy Workforce Coalition

We are a new coalition seeking to build clean energy career pathways for and with low-income women & women of color, while helping employers create more gender-inclusive and caregiver-friendly workplaces.

We are local government, climate & supportive service nonprofits, economic development, university, labor, and more. Starting as a Core Team of four, we're excited to grow to 10 in the months ahead, setting up pre-apprentice + pathway awareness programs and a Tradeswomen Alliance, all for equitable and diverse clean energy jobs.
