

# Team Philly

The Mobile Energy Center (MEC) will connect ECA to new populations and reach existing constituents wherever they go.

Fully investing in the MEC will support longer-term staffing, earlier fitout, and better marketing of the MEC's route to communities it stops in.

Our Energy Fair program has already engaged residents in Northeast Philadelphia neighborhoods.

**Key Metrics:**  
**Energy Access:** Reached over 200 community members  
**Energy Vulnerability:** Helped over 100 families avoid termination  
**Energy and Climate Resilience:** Provided energy conservation workshops and self-weatherization kits to 140 households
